

## 2021 Mill & Overlay Program Update #5 (Final) – 6/10/21

### What has happened this past week?

- Milled top 2" of pavement 4<sup>th</sup> St from General Sieben Dr to Pleasant Dr (Thursday 6/10)
- Paved top 2" of pavement 4<sup>th</sup> St from General Sieben Dr to Pleasant Dr (Friday 6/11)

*Above Left: First two passes of mill on 4<sup>th</sup> Street*

*Above Right: One more pass of mill to go!*

*Above: Milling Operation*

### What is scheduled for next week?

- Apply traffic markings approximately 1 week after paving.
- Install compost seed (waiting for heat to subside!)
- Project clean-up.
- Project is essentially complete!

This will be the last construction update. Thank you for your patience with the project and enjoy the new roadway surface! The City respectfully asks residents to help keep their newly applied compost seed watered to increase the success rate during the hot summer months. Please know that a second application of compost seed will be applied to areas of need in September when the air temperature cools down a bit.
